PUBLICATIONS OF THE BUREAU VERITAS

The Register (with fortnightly supplements).

The Register, published annually since 1828, appears on the 1st of January, and gives alphabetically the names of all sailing or steam vessels of which the construction or repairs have been superintented by the Surveyors of the Society stationed at the principal ports of the world.

The Register gives, for each vessel, the class assigned, expressing the degree of confidence to be placed in the vessel; as also complete technical information regarding the hull, engines, and boilers.

The Repertoire General of Merchant Shipping.

This work, published in two volumes (one for sailing vessels, the other for steamers), contains a complete list of all merchant vessels in the world, above 50 tons gross for sailing vessels, and above 100 tons gross for steamers. It gives for each vessel information as to construction, type, ownership, method of propulsion, port of registry, etc.; and may be considered as the complement of the Register.

It has been issued annually since 1870, and appears about the 15th September.

Monthly List of Wrecks and Casualties.

The "Monthly List of Wrecks and Casualties", which forms a Supplement to the "Repertoire General", has appeared since 1866. This publication reports the casualties that have happened to vessels, in alphabetical order of their names, with the nature of the casualty, the date of its occurrence and the voyage engaged on. The list is divided into two parts, Steamers and Sailing vessels, and sums up every month, in statistical form, according to flag and the nature of the casualty, all losses and accidents which have been recorded.

Annual Summary of Wrecks and Casualties.

This is a revised summary of the information given in the "Monthly List of Wrecks and Casualties". The vessels are entered in alphabetical order, and the accidents that have occurred during the twelve months are grouped under each name. The names of the vessels are rearranged in alphabetical order, so that all casualties which have happened to any vessel, during the twelve months, can at once be seen. Other useful Statistical Tables are contained.

Rules for the construction and classification of steel vessels.

Rules for the construction and classification of wooden vessels.

Rules for the construction and classification of vessels for inland navigation.

Rules for the construction and classification of wooden, composite, and steel yachts.

Rules for the construction and classification of motor boats and for the fitting of explosion engines into vessels of all kinds.

Extract from the Rules and Regulations for the Building of Steel and Iron Works (Chapter X. — Tests of Materials, Anchors, Cables and Ropes, etc.).

Rules for the testing of materials not intended for Shipbuilding and Bureau Veritas Specifications.
